

A

Surface text can reverse the predicted polarity

Unresolved reference and implicit sarcasm make a negative utterance appear positive.

LOCAL DISCOURSE CONTEXT

Turn -2 "The trailer looked exciting."

Turn -1 "But the plot went nowhere.
I kept checking the time."

Target "Yeah, that was just great."

Audio  subtle / ambiguous prosody

Visual  weak facial evidence

Illustrative MOSI-style example (not a verbatim dataset sample)

Surface lexical cue
"great" → positive

Unresolved reference
What does "that" denote?

Implicit meaning
Sarcastic intent
remains hidden

POLARITY ERROR

Prediction

Positive (+1)

Reference

Negative (-2)

Text ambiguity dominates when nonverbal evidence is weak.
